Montreal, Quebec, Canada
Remote work from: Canada

Date posted
November 29, 2023

Description

Hello there, future data wizard! 🧙‍♂️🧙‍♀️🧙‍♂️🧙‍♀️

At **Mirabilis AI**, we're on the hunt for a **Data Scientist** who can turn coffee into code and data into gold. If you're someone who dreams in algorithms and speaks fluent Python, you might just be the one we're looking for!

Responsibilities

- **Data Wrangling**: You'll be wrestling with data, cleaning it, transforming it, and generally making it behave.
- **Model Building**: You'll be crafting predictive models like a master blacksmith forges a sword.
- **Insight Generation**: You'll be the Sherlock Holmes of data, uncovering insights and trends that mere mortals might miss.
- **Communication**: You'll need to translate your complex findings into simple, digestible insights for our team of non-data wizards.

Qualifications

- **Education**: A degree in Computer Science, Statistics, or a related field. Or, you know, a Hogwarts diploma (just kidding!).
- **Experience**: At least 2 years of experience wrestling with unruly datasets.
- **Skills**: Proficiency in Python, R, SQL, and the ability to learn new spells… er, programming languages.
- **Tools**: Familiarity with data science tools like Jupyter, TensorFlow, and PyTorch.

Job Benefits

- **Flexible Hours**: We understand that even data wizards need to sleep.
- **Competitive Salary**: We value your magic and will make sure you're compensated accordingly.

So, if you're ready to put your wizard hat on and dive into the magical world of data at **Mirabilis AI**, apply today! We can't wait to meet you. 🧙‍♂️🧙‍♀️
